$4\frac{1}{2}$ more than personal use, but less than large shipment — one package, plastic wrapped of about a pound ~~or less~~ or less of white powdery substance — very bitter — about the consistency of powdered sugar (AOL — cocaine)

$4\frac{1}{2}$ — obtains drugs from supplier on hand — and uses personally and for his friends

1/2 - during the period of increased activity the ship is tied up near the marina - must use a shuttle craft to get back and forth. This seems to be the same location as in present.
